

DROPOUTS: 2008–09 and 2009–10

Introduction

This report presents district and school dropout data for the 2008–09 and 2009–10 school years. Analyses address grade level, race/ethnicity, gender, economic disadvantage, and English language proficiency.

Background

The San Diego Unified School District reports dropout data to the California Department of Education (CDE) through the annual data submission process. The CDE defines a dropout as any student in grades 7–12 who:

- left school before graduation or attainment of the legal equivalent (passed the General Educational Development [GED] examination or the California High School Proficiency Examination [CHSPE] or received an adult education diploma)¹ and
- did not return to a school or an educational program by the first Wednesday in October (i.e., Census Day) of the following school year.

Although this general definition has applied for many years, it is important to note that in recent years there have been significant changes in a) dropout working definitions, b) reporting methods, c) additional steps taken to follow up on dropouts, and d) final database lookups. These changes must be considered when reviewing recent dropout rates and rates over time.

Working definition. Beginning with 2002–03, the CDE changed the dropout working definition to align California’s definition with that of the National Center for Education Statistics (NCES). This resulted in a higher “new-rules” dropout rate than the rate derived using the old rules.

The changes included 1) modifying the dropout timeframe to the beginning and end of the regular school year (September to June for traditional schools and September to July for year-round schools) instead of from April to April, 2) designating all students who move out of the United States as non-dropouts, regardless of documentation of enrolling in school in another country, 3) designating as dropouts students who enroll in the High School Diploma Program (HSDP) but are not still enrolled on Census Day of the next school year (in the past, students who earned at least one credit through the HSDP during the dropout period were not considered dropouts), 4) designating students as dropouts if they enrolled in a community college and are not still enrolled on Census Day (prior to 2002–03, these students were not counted as dropouts), and 5) allowing

¹ The CDE identifies students who complete the GED or an adult education diploma (such as the San Diego Unified/San Diego Community College Joint Diploma Program diploma) as school completers, not graduates. Beginning in 2009–10, the CDE identifies students who pass the California High School Proficiency Exam (CHSPE) as graduates rather than completers. Grade 12 students who have received a Letter of Recognition are not counted as dropouts. See Administrative Procedure 4770 C.2 for the definitions of these documents.

severely disabled students to count as dropouts.

The “new-rules” grade 7–12 dropout rate for 2002–03 was 3.5 percent (2,040 dropouts), about 25 percent higher than the “old-rules” rate of 2.8 percent (1,607 dropouts). The primary impact of the changes was on grade 9–12 dropout rates. The benefit of these changes is that district, California, and NCES reports of national dropout rates are comparable.

Starting in 2008–09, an additional rule was implemented, which rendered students as only state dropouts if they completed grades 6 or 8 but did not return to school in the following year. This change decreased the number of dropouts for the district and individual schools. It appears that the state reasoned that the receiving schools, which never see incoming students who do not show up, should not be responsible for them as dropouts. Therefore, there are decreases in the middle schools’ 7th grade and the high schools’ 9th grade dropout counts. Because of this new rule, the district’s 2008–09 grade 9 dropout count was cut by almost half from 136 to 72, resulting in a 50 percent rate decrease (from 1.2 to 0.6). Including these students, the 2008–09 grade 9–12 one-year rate would have been 2.3 (rather than 2.1) – a difference of 6.9 percent – and the estimated four-year rate would have been 9.4 (rather than 8.9) – a difference of 5.4 percent.

Reporting method. In 2006–07, the CDE made a major change in the method of dropout reporting. Before 2006–07, the district annually reported aggregated dropout data for schools through a CBEDS report uploaded to the CDE. Beginning with 2006–07, summary data were no longer submitted. Instead, dropouts for 2006–07 and 2007–08 were part of the annual submission of individual enrollment records to the California Student Information Service (CSIS) system, in which all California public schools’ student enrollments are reported. Starting in 2008–09, the system was transferred to the California Longitudinal Pupil Achievement Data System (CALPADS). These enrollment records show the beginning and end dates of the enrollments (among other data). When a student leaves the district, the enrollment record receives an exit code that indicates the nature of the exit, including codes that indicate whether the student has dropped out. After the records are submitted for a school year, the district’s dropout count may be reduced when it is discovered that a “dropout” has enrolled in another California public school during the year following the dropout period. The dropout count may increase, however, if students thought to have transferred to another California public school do not show up at their expected destination.

Following up on dropouts. Secondary schools routinely document the school status of students who left during the dropout period. Documentation data were collected from schools via a customized data collection screen in the district’s student information system (SIS). Schools are asked to indicate where a student is currently enrolled, or other whereabouts of the student, for every student who leaves the district. School staff may update this “exit screen” immediately upon a student’s exit from the district, allowing them to complete the information throughout the school year as students exit. Initial determinations of dropouts are made using these data. The Research and Reporting Department takes additional verification steps.

Since 2002–03, the initial set of grade 9–12 dropouts has been electronically matched with San Diego Community College adult education and regular program enrollments and with records of students who have received a GED through the adult education program. Beginning with the

2004–05 dropout reporting, the Research and Reporting Department has added two additional steps that were not taken in prior years. The first is to conduct a telephone survey regarding all students tagged as dropouts after schools had provided their documentation information to the Research and Reporting Department. The second step is to have the California Department of Education match the district’s potential dropouts against student enrollment data in the CSIS system. These additional steps reduced the district’s 2007–08 dropout count by several hundred students.

Starting in 2008–09, the second step of matching students using CSIS was no longer necessary since district staff members were now able to search for students one at a time on the online CALPADS database, which has since been utilized throughout each school year, not just once a year. More students were found to have re-enrolled in another California public school in the CALPADS database compared to CSIS because of this ability to search for students by name. The searches often resulted in finding the same student with more than one student state identifier (SSID). Therefore, when a student’s two SSIDs were merged, the complete enrollment history of the student showed that the student was not, in fact, a dropout. This reduced the dropout count for the district by dozens.

Final lookup. The district determined that a handful of students in 2008–09 and 2009–10 were not dropouts after the state finalized the numbers. These students re-enrolled in a San Diego Unified School District school or another California district school within the appropriate time period (i.e., on or before Census Day [October 7, 2009 and October 6, 2010, respectively]). Data were discovered via searches in the district’s local student information system and CALPADS. These students were not documented in time for state reporting, resulting in a difference between the numbers in this report and the CDE’s (see <http://dq.cde.ca.gov/dataquest>).

2008–09 and 2009–10 Dropout Rates

Types of Dropout Rates. Two types of dropout rates are used in this report to provide different perspectives on the student dropout issue:

- The **single-year rate** measures the proportion of students who drop out in a single year. This rate is computed by dividing the number of dropouts for a group by that group’s Census Day enrollment and multiplying by 100. This rate is used most often in this report.
- The **estimated four-year rate** measures the dropout rate for a high school graduation class based on each grade’s dropout rate (grades 9–12) for the current year. This rate estimates the proportion of students in grade 9 that is expected to drop out over the course of four years of high school, presuming the underlying grade-specific dropout rates remain unchanged from the current year. The rate is derived by successively multiplying the “survival” rates $((100 - \text{dropout rate})/100)$ for each grade to achieve a four-year survival rate, multiplying that figure by 100, and subtracting the result from 100.

Due to the rule changes, district dropout data for years prior to 2002–03 are not comparable to those for 2002–03 and later years. Therefore, the main focus of this report is on 2002–03 and af-

ter. However, to provide the reader some sense of district dropout rates over a longer period, some analyses include data for earlier years.

District Grade 7–12 Single-Year Dropout Rates. In 2009–10, 739 grade 7–12 students dropped out, substantially fewer than the prior two years (933 in 2008–09 and 1,181 in 2007–08). These numbers include district charter schools. Figure 1 shows district grade 7–12 dropout rates for the past decade. The old- and new-rules rates for 2002–03 illustrate the effect of the rule changes that year. (The new-rules rate of 3.5 percent was about a quarter higher than the old-rules rate of 2.8.) In 2009–10, the district grade 7–12 dropout rate was 1.2 dropouts per 100 enrolled students, a large decrease from 3.5 percent from three years prior (see Appendix A for the 2008–09 and Appendix B for the 2009–10 district dropout data sheets).

This sudden decrease in the dropout rate in 2007–08 and the continued decline thereafter could be partially due to dedicating more time and resources to tracking down potential dropouts. Through phone calls to students and emails to other California districts, a large number of potential drop-outs were found to be enrolled

in school. Many students otherwise would have counted as dropouts because the subsequent school district assigned a different SSID to the student, thus breaking the link from that student’s prior enrollment history. Through contact with family members, many others were found to be attending school out of state. This information was not recorded at their prior school, so these students would otherwise have been counted as dropouts. In addition, although many contacted students were still counted as dropouts, some were recovered and reenrolled in the district to attempt to complete their high school education. Because of the large amount of time and effort that went into tracking down potential dropouts in the past three years, these rates are not completely comparable to those of prior years. And as previously noted, starting in 2008–09, students who dropped out between 6th and 7th grade and between 8th and 9th grade are no longer counted against the district, further reducing the dropout rate.

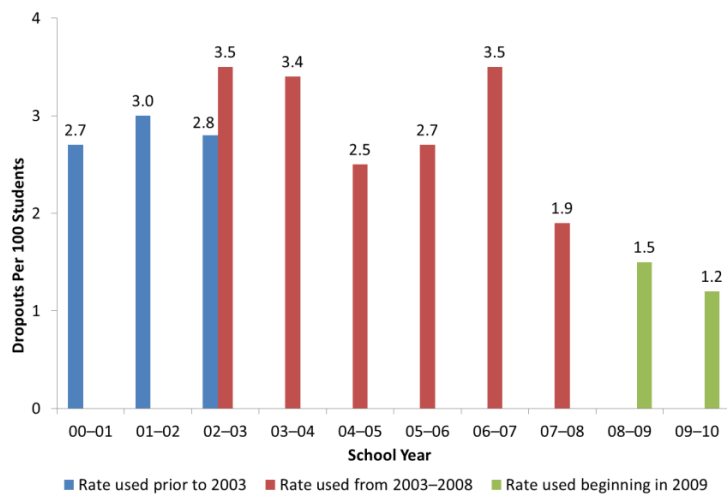

Figure 1. Grade 7–12 Single-Year Dropout Rates, 2000–01 to 2009–10

Middle Level and High School Dropout Rates. Middle level grade 7–8 dropout rates for the past 10 years are shown in Figure 2. The 2002–03 old-rules rate was higher than the new-rules rate. The grade 7–8 dropout rate was 0.1 percent for 2009–10, two-thirds lower than the prior year (0.3 in 2008–09), which was three-quarters lower than previous year (1.2 in 2007–08). Between 2007–08 and 2009–10, the number of grade 7 dropouts decreased by 93 percent (112 to 8), and the number of grade 8 dropouts decreased by 84 percent (132 to 21). As mentioned previously, these reductions in the number of dropouts may be partly due to the district’s extensive efforts to track down students. The grade 9–12 dropout rate was 1.7 percent in 2009–10 (see Figure 3), the lowest rate since 1986–87 (the earliest year that dropout statistics have been reported).

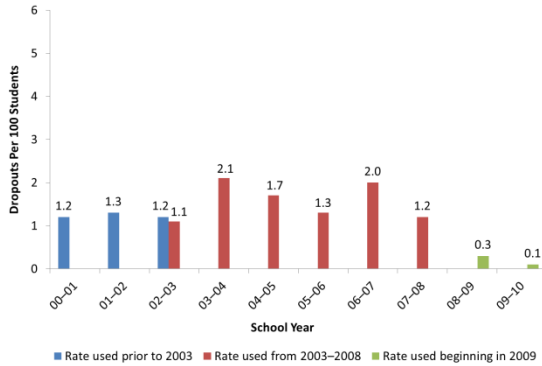

Figure 2. Grade 7–8 Single-Year Dropout Rates, 2000–01 to 2009–10

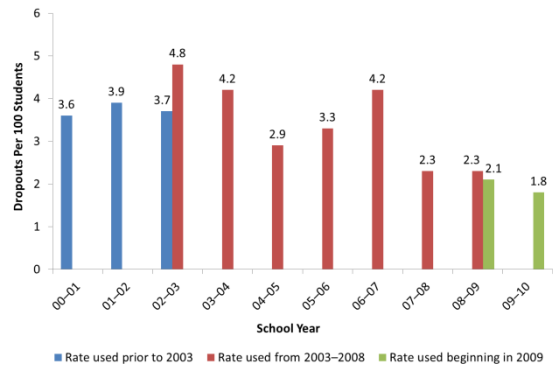

Figure 3. Grade 9–12 Single-Year Dropout Rates, 2000–01 to 2009–10

In 2009–10, 710 grade 9–12 students dropped out, 18 percent fewer than in 2008–09. The proportion of 2009–10 dropouts by grade level is shown in Figure 4. The overall pattern of a higher proportion of dropouts in grade 12 in 2009–10 was also seen in the four prior years. Between 2008–09 and 2009–10, the number of grade 9 dropouts decreased by 6 percent (from 72 to 68), and grade 10 dropouts decreased by 32 percent (from 142 to 96). The reduction in the number of dropouts was also evident in the upper grade levels: grade 11 dropouts declined by 27 percent (209 to 153), and grade 12 dropouts fell by 12 percent (445 to 393). Again, dropout decreases in these grade levels may be partly explained by new efforts to track down students.

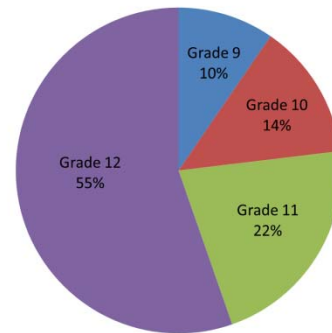

Figure 4. Proportion of Dropouts by Grade Level, 2009–10

Estimated Four-Year Dropout Rate. Another way to look at high school dropouts is the estimated four-year dropout rate, a surrogate for the “high school dropout rate.” Figure 5 shows the estimated four-year rates for the last decade. The current rate of 7.2 percent is the lowest rate in the past 23 years. This rate means that an estimated 72 of every 1,000 district grade 9 students will drop out before graduation. Applying this estimate to 2009–10 grade 9 enrollments would result in about 755 students dropping out before completing high school in 2012–13, around 356 fewer than the estimate using 2007–08 numbers.

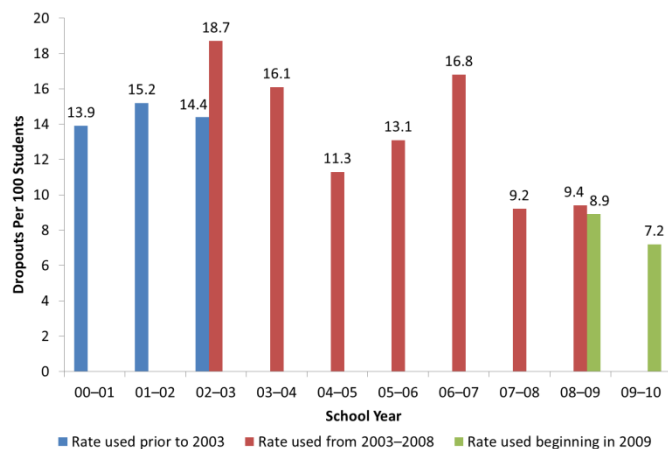

Figure 5. Grade 9–12 Estimated Four-Year Dropout Rates, 2000–01 to 2009–10

Student Group Analyses. Dropout rates vary among student subgroups. The following section explores dropout rates for specific groups of students in the district.

Grade Level. Grades 7–10 and grades 11–12 have shown different patterns of dropout rates (see Figure 6). Grade 7–10 dropout rates increased in 2006–07 followed by the beginning of a three-year drop. Rates for grades 11–12 also increased substantially in 2006–07 and then decreased in 2007–08 but bumped up in 2008–09 before declining again in 2009–10. The one pattern evident for all grade levels was a sizable drop in 2007–08. The rates for these grade levels in 2009–10 were 3 percent (grade 9) to 60 percent (grade 7) lower than in 2008–09. There were 52 fewer grade 12 dropouts in 2009–10 than in the prior year.

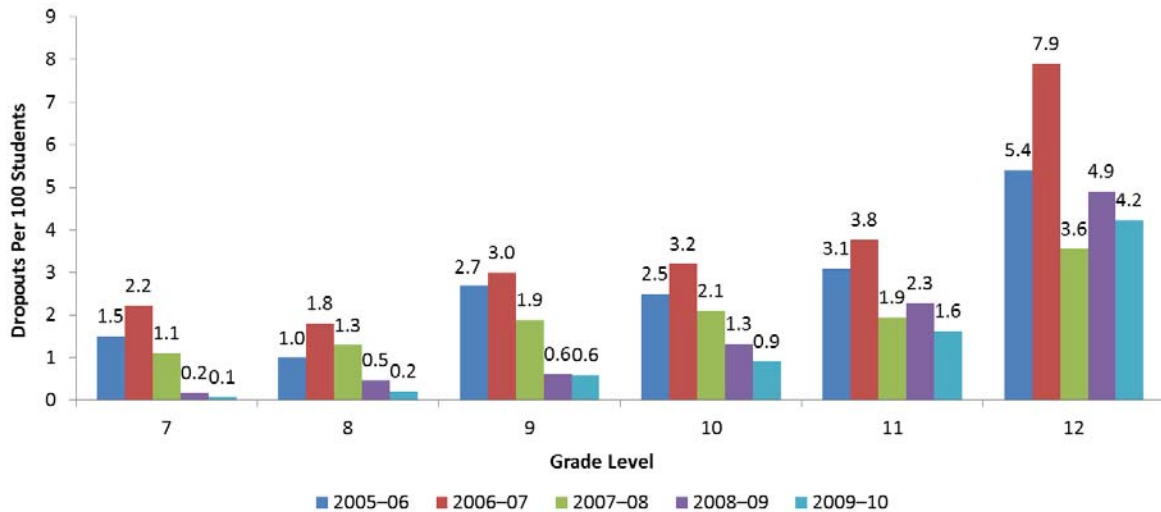

Figure 6. Single-Year Dropout Rates by Grade Level, 2005–06 to 2009–10

Race/Ethnicity. In 2009–10, grade 7–12 dropout rates for all racial/ethnic groups decreased from the prior year, with the exception of Asian students, whose rate has remained stable for the past three years (see Figure 7). The Filipino rate decreased the most, 49 percent, followed by the rates for Indochinese (by 33 percent), African American (by 31 percent), White (by 20 percent), and Hispanic students (by 14 percent). Although the rates for most ethnic groups jumped in 2006–07, their rates in 2007–08 were lower than those in 2005–06.

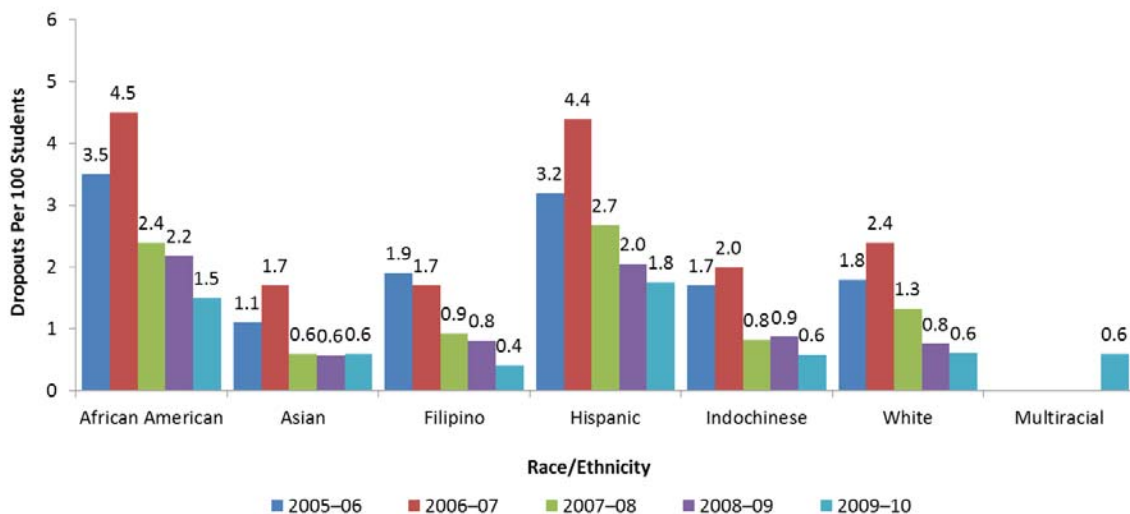

Figure 7. Grade 7–12 Single-Year Dropout Rates by Race/Ethnicity, 2005–06 to 2009–10

Starting in 2009–10, in compliance with new federal guidelines, the district added a new racial category for students who are considered to be multiracial. Students are multiracial when they choose more than one race on their enrollment forms. For example, a student may choose both “White” and “Indochinese” and thus be considered multiracial. However, if “Hispanic” is selected along with another race, then the student is not considered multiracial but solely Hispanic. Students who were already enrolled in the district prior to 2009–10 were given the opportunity to change their racial category. Therefore, comparisons of racial-ethnic data with years prior to 2009–10 should take these changes into account.

Figure 8 shows a pattern for grade 7–8 students similar to that for all grade 7–12 students; students of all racial/ethnic backgrounds but Asian had lower dropout rates for 2009–10 than for the prior year. The dropout rates for Filipino and Indochinese students dropped to zero, while the rate for African American students fell by 88 percent. The Hispanic and White rates decreased by over one-third each.

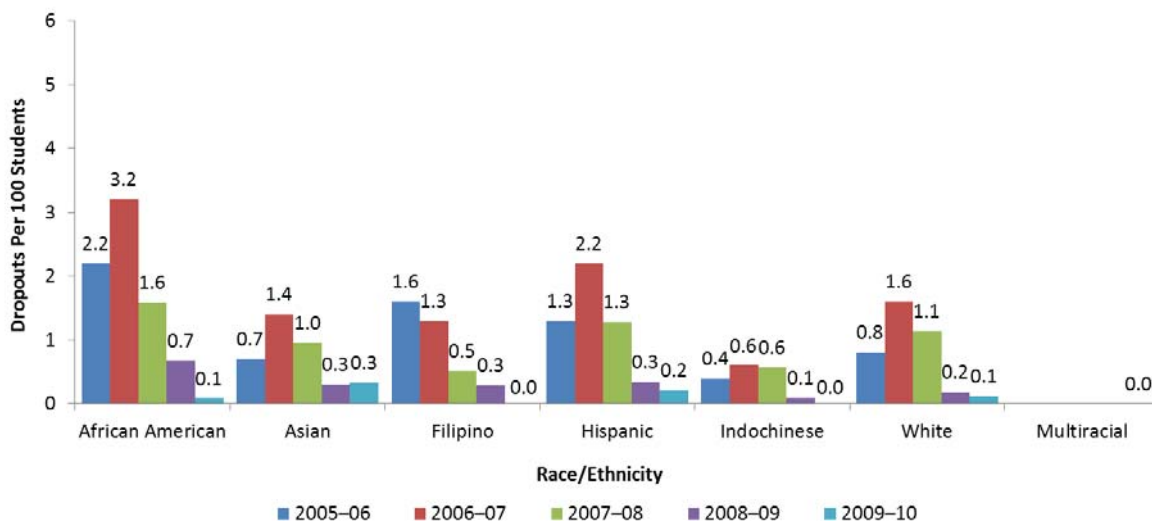

Figure 8. Grade 7–8 Single-Year Dropout Rates by Race/Ethnicity, 2005–06 to 2009–10

Students in grades 9–12 also saw decreases in their dropout rates from the prior year, with the exception of Asian students, whose rate remained stable (see Figure 9). The Filipino rate dropped by 43 percent, the Indochinese rate by 32 percent, and the African American rate by 26 percent. Other racial/ethnic groups saw lesser decreases of 19 percent (White students) and 13 percent (Hispanic students).

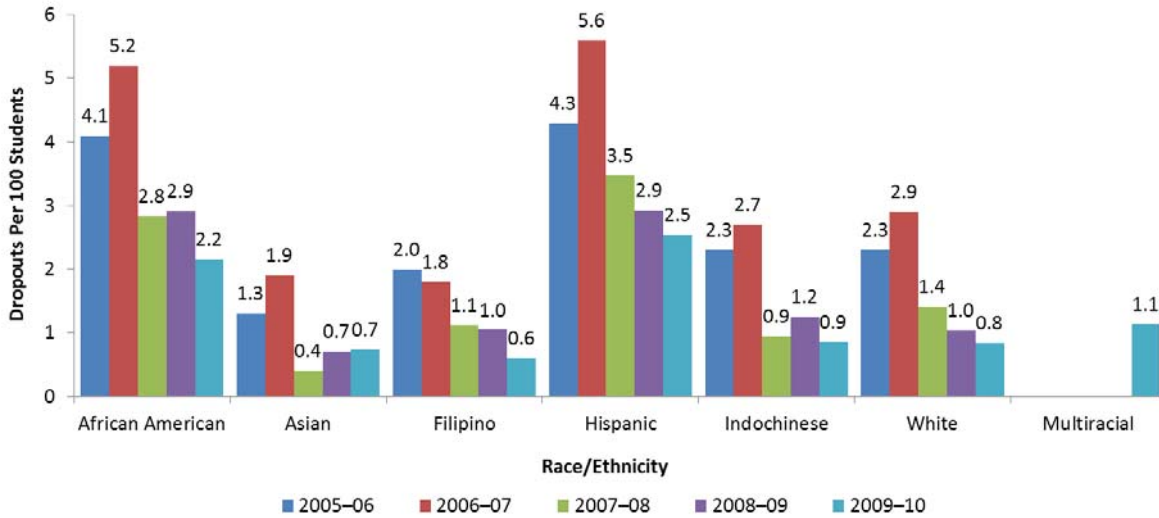

Figure 9. Grade 9–12 Single-Year Dropout Rates by Race/Ethnicity, 2005–06 to 2009–10

Grade 12 racial/ethnic dropout rates are of particular interest because of the large proportion of students who drop out in grade 12. Figure 10 shows that all groups had sizable grade 12 rate decreases from 2006–07 to 2007–08. This was followed by a bump up in 2008–09 for all groups except White students, whose rate remained stable. For those groups whose rates increased in 2008–09, their rates decreased in 2009–10. The largest decrease (57 percent) was for Asian students, followed by African American (31 percent), Indochinese (30 percent), Filipino (28 percent), and Hispanic (9 percent) students.

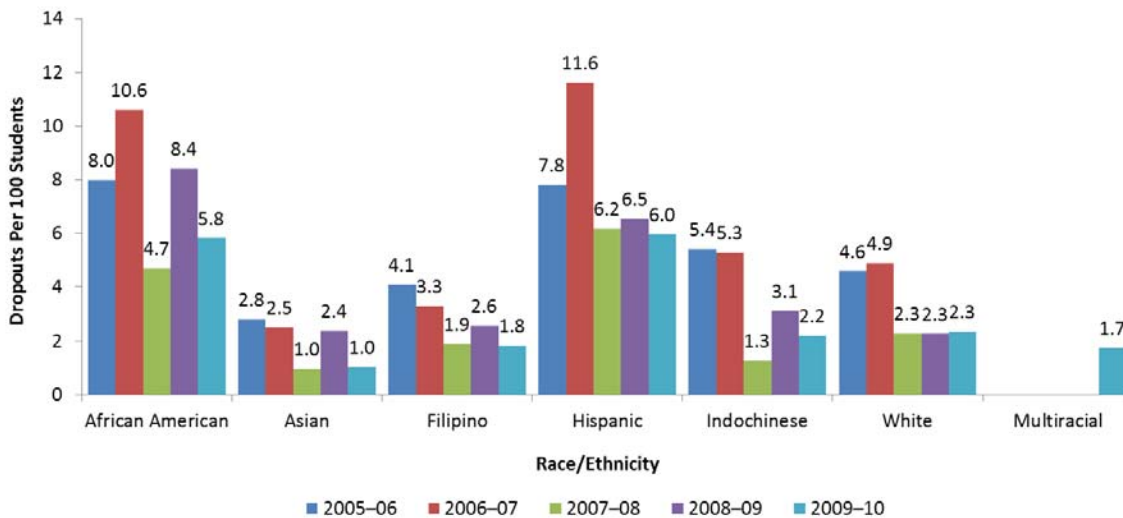

Figure 10. Grade 12 Single-Year Dropout Rates by Race/Ethnicity, 2005–06 to 2009–10

Gender. Traditionally, grade 7–12 male students are at greater risk of dropping out than female students (Figure 11). But, in 2007–08, the gap between the two groups decreased to a difference of only 0.1. Male and female dropout rates, after little or no change from 2002–03 to 2003–04, decreased sharply in 2004–05. In 2005–06 the female rate was unchanged from the prior year

and the male rate increased slightly. In 2006–07, the rates for both genders increased to levels close to those in 2003–04. Then, the rates for both dropped in 2007–08, then again in 2008–09 and again in 2009–10 to their lowest levels in eight years.

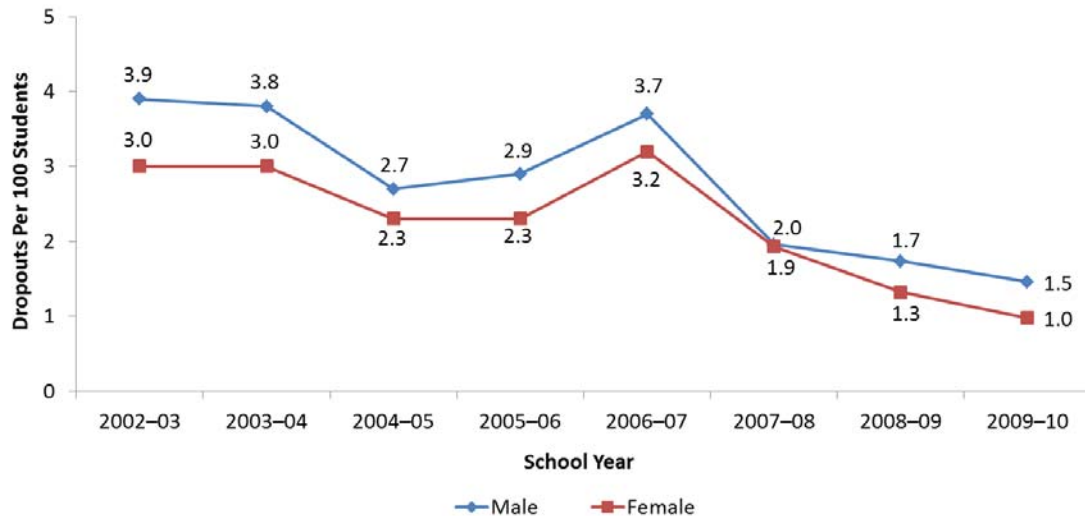

Figure 11. Grade 7–12 Single-Year Dropout Rates by Gender, 2002–03 to 2009–10

Figure 12 shows that male and female dropout rates varied by grade level in 2009–10. Grade 7 was the only grade level for which male students had a lower rate than female students. For grades 10 and 11, dropout rates for males far exceeded those for females, over 80 percent higher.

Economically Disadvantaged.

For this analysis, students certified eligible for free or reduced-price meals are identified as economically disadvantaged.² In 2009–10, the grade 7–12 dropout rate was 1.2 percent for both economically disadvantaged (ED) and non-ED students. This contrasts with the prior years when the ED rate was substantially higher than the non-ED rate. From 2008–09 to 2009–10, the ED rate decreased by about 60 percent, while the non-ED rate increased by 100 percent.

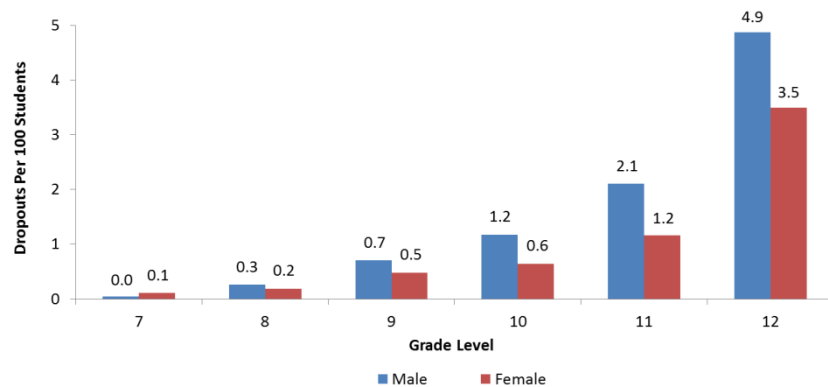

Figure 12. Single-Year Dropout Rates by Gender and Grade Level, 2009–10

² Meal-eligibility data for charter school students were omitted from updates in the district's student information system between 2005–06 and 2010–11. For most charter schools using district food services, this resulted in undercounts of economically disadvantaged students; however, at the same time, some students may have been misidentified as eligible even though they no longer met the requirements. Therefore, analyses of economically disadvantaged rates should be made with caution.

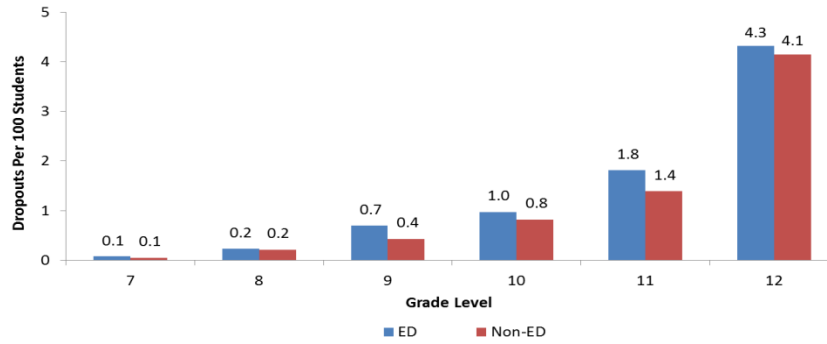

Figure 13. Single-Year Dropout Rates by ED Status and Grade Level, 2009–10

Grade-level differences in dropout rates for ED and non-ED students are shown in Figure 13. The dropout rates for ED students slightly exceeded those for non-ED students at all grade levels. The grade 9 ED rate was about two-thirds higher than the non-ED rates. The narrowest gap was in grade 12, for which the ED rate was about four percent higher

than the non-ED rate. The reason why the overall rate for ED and non-ED students can be the same (1.2) while still showing grade-level differences is that the proportion of ED students among dropouts is the same as the proportion of ED students among the entire enrollment (60 percent for both), although these proportions vary at the grade level (e.g., grade 9 ED students represent 74 percent of the total grade 9 dropouts but 63 percent of the total grade 9 student population).

English Language Proficiency. The 2009–10 English learner (EL)³ student dropout rate was 2.7 percent, down from 3.6 percent two years prior. The non-EL student rate was 1.0 percent, little more than half the rate of 1.6 percent in 2007–08. Figure 14 shows that the EL dropout rate (2.7 percent) was almost three times that for English-only students (1.0 percent) and students reclassified as English proficient (0.9 percent) and almost four times higher than that for initially fluent students (0.7 percent). EL students who clear the hurdle of reclassification are not as likely to drop out as EL students who have not demonstrated that level of English proficiency.

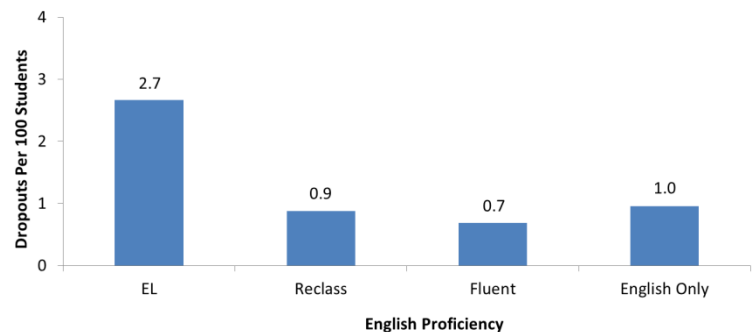

Figure 14. Single-Year Dropout Rates by English Language Proficiency, 2007–08

Figure 14 also shows that the risk of dropping out is slightly greater for English-only students than for English-fluent students with a second-language background. The relationship is complex. Although EL students were more likely to drop out than English-only, fluent, and reclassified students, the English-only group had a higher dropout rate than fluent and reclassified students.

³ Any student who lives in a home where a language other than English is spoken must take the California English Language Development Test (CELDT) within 30 days of his/her first date of enrollment in school to determine whether the student is fluent English proficient or an English learner. The CELDT is then administered each year to English learners until they are reclassified as fluent English proficient.

Students with Disabilities Dropouts. Consistent with most prior years, the grade 7–12 dropout rate for students with disabilities (SWD)⁴ in 2009–10 (2.3 percent) was higher than the rate for students in general education (1.1 percent). Figure 15 shows that SWD dropout rates were higher than those for students in general education in all grade levels with the exception of grade 7. The rate for grade 12 SWD was about 81 percent higher than that for grade 12 students in general education

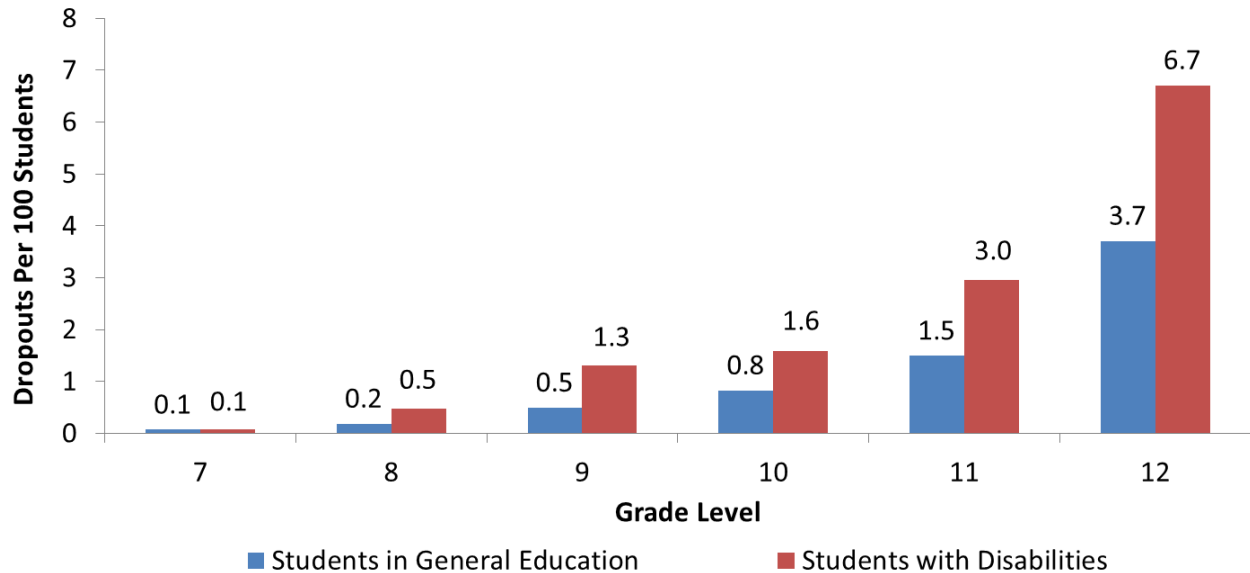

Figure 15. Single-Year Dropout Rates by Students with Disabilities Status and Grade Level, 2009–10

School Analyses. Individual school dropout figures are grouped into middle level, senior high, and alternative schools. Schools with an atypical grade configuration have grade 7 and 8 figures reported with middle level school data and grade 9–12 data among senior high school figures. Charter school data are also presented within their grade configuration groupings. School dropout data sheets are in Appendix C (2008–09) and Appendix D (2009–10).

Middle Level. The dropout rate for grade 7–8 middle level schools dropped 90 percent in two years, from 1.0 percent (203 dropouts) in 2007–08 to 0.3 (65 dropouts) in 2008–09 and to 0.1 percent (27 dropouts) in 2009–10 (see Table 1). Eleven middle schools had rate decreases between 2008–09 and 2009–10, but most decreases were small. The largest drop was seen at Taft, whose dropout counts fell by 86 percent, from 7 in 2008–09 to 1 in 2009–10.

Senior High. The grade 9–12 senior high school dropout rate decreased from 1.7 percent in 2007–08 to 1.5 percent in 2008–09 and then increased to 1.8 in 2009–10, with the dropout count decreasing from 606 to 542 to 419, respectively (see Table 2). Thirteen schools had dropout rate decreases, seven had rate increases, and five had rates essentially unchanged from 2008–09. Four schools had substantial rate and count decreases: Lincoln, Mira Mesa, Morse, and San Diego SciTech. Lincoln’s dropout counts fell by 62 percent, from 73 in 2008–09 to 28 in 2009–10.

⁴ Students with disabilities (SWD) are those with Individual Education Programs (IEPs).

Alternative. The dropout rate for alternative schools decreased from 8.6 percent in 2007–08 to 7.4 percent in 2008–09 to 7.0 in 2009–10 (see Table 3). The rates for six schools decreased, those for five schools increased, and those for two schools remained the same (at zero dropouts for Riley and Whittier). Three schools had substantial dropout rate decreases. Most notably, for the third year in a row, LCI’s rate dropped the most, from 9.4 percent in 2008–09 to 5.9 percent in 2009–10, due to 14 fewer dropouts.

Charters. Charter schools as a whole had a dropout rate slightly lower than that for district-managed schools (1.0 percent versus 1.3 percent). Charter schools had proportionally fewer dropouts than expected, comprising 12.0 percent of the dropouts while making up 14.4 percent of the student population. When disaggregated by grade level, the difference was greatest in grade 7, where 42.9 percent of the dropouts were charter students while only 17.8 percent of the student population for that grade level were charter students. Although charter schools as a whole have a lower proportion of dropouts than district-managed schools, a few individual charter schools have some of the highest dropout rates in the district. SWD were more likely to drop out at a district-managed school (2.3 percent) than at a charter school (1.6 percent), while students in general education at district-managed schools were slightly more likely to drop out (1.1 percent) than students in general education at charter schools (1.0 percent). Economically disadvantaged students at district-managed schools were almost twice as likely to drop out as similar students at charter schools (1.3 percent versus 0.7 percent). However, as previously mentioned, economically disadvantaged student data for charter schools may have been underreported for 2009–10, so comparisons of these students between charters and district-managed may not be appropriate.
